Experience

Software Developer

PnPSoft

- Worked closely with a small team on design of the PoC, development of the MVP, and release of the beta version of a B2B collaboration tool while following Agile methodologies
- Revamped database schema, optimizing object relationships for improved efficiency
- Managed database and server operations, ensuring high reliability
- Proposed and implemented several innovative ideas for UI/UX improvements, including a same-window chat/task detail management feature to minimize context switching
- Integrated Google OAuth2 for login alongside in-house authentication mechanisms to improve convenience
- Built and maintained RESTful APIs for diverse services, including CRUD operations, to support functionality and improve business flow

June 2021 – December 2024
